**Partners:**

This project has been funded with support from the European Commission. This publication is responsibility of the project consortium. The Commission is not responsible for the use made of the information contained therein

## TRAINING TOOL BASED ON THE USE OF ICT FOR RISK PREVENTION AND SAFETY IN THE TRAWLING FISHING (DVD: SAFE FISHING)

2014-1-ES01-KA202-004404

SAFE FISHING is a project funded by the "*Strategic Partnerships*" action of the European Commission's *Erasmus+ Programme*.

It's involved in the "*Cooperation for innovation and the exchange of good practices*" key action (KA2).

It has been developed from September 2014 until August 2017

### General information:

The legislation in occupational hazards matter establishes that the workers must receive **periodically a specific training depending on their working place**. It is habitual that this training ends up being **very general for all workers, instead of specific**, and it is habitual **also not to get the periodic training** for the complications that the organization of the same one carries, especially in sectors as this one in which the workers are relocated by long periods. Therefore, the workers are not adequately trained in preventive measures with the consequent risk of accident.

At present, the training in occupational hazards of the trawling fishing activity **is given by traditional technologies of learning. Isn't updated with the new technologies**. Also, there **do not exist programs of training of prevention of labor risks normalized to European level**. The standardization of the training to European level and the use of ICT will give an added value to the same one, facilitating the mobility of the personnel and improving their qualification.

Based on these needs identified in the trawling fishing sector in terms of qualifications and learning for an appropriate management of occupational risks associated with the activities of trawling fishing, the proposal "**SAFE FISHING**" arises whose aims are:

- To **provide and to advise to the sector of the trawling fishing in a transverse skills corresponding to the prevention of labor risks**: "Program Normalized to European Level for the management of the prevention of labor risks in the trawling fishing sector"

- To promote an educational innovative development in the sector with the use of the ICT: “DVD: SAFE FISHING”

Spain has a preventive contents, financed and supported by a **Public Entity as for Prevention of Labor Risks** that will be used as reference for this project. But these have not developed to there be given by tools ICT

This preventive contents are denominated "**ANÁLISIS DE LA PROBLEMÁTICA DE LA SINIESTRALIDAD EN EL ARTE DE ARTRASTRE EN LA PESCA DE ALTURA Y GRAN ALTURA: GUÍA DE PROCEDIMIENTOS DE ACTUACIONES PREVENTIVAS**".

Adapting and improving the Spanish contents through the use of the ICT, the partnership will develop a specific, audiovisual training contents which will be used by the workers to develop their daily activities in safer conditions and fewer workplace accidents.

#### Consortium:

The project partnership is composed by six partners from five European countries with great experience in vocational training in the sector and in prevention of occupational risks.

- **ARVI** (professional association): *Spain*
  - **SGS TECNOS** (multinational corporation): *Spain*
  - **INFORCOOP** (training centre): *Italy*
  - **IMP** (specific institute of the sector): *France*
  - **RTEU** (University): *Turkey*
  - **EUROPECHE** (European Association): *Belgium*
- **ARVI** is the **promoter** and it will contribute with the material of reference to adapt and to improve it with the rest of countries. It will contribute with the sectorial vision about the current situation in Spain for the study of needs, the adjustment of the current contents, the identification and development of the new preventive contents, as well as will contribute with the users (trainers and workers) of the sector necessary for the Pilots.

Along with SGS, ARVI will be responsible for the dissemination of this project and its results in Spain in order to ensure an adequate impact and sustainability.

- **SGS** is the consulting one with an extensive experience in prevention of labor risks, activities of training, development of training tools and Programs of Training, studies of investigation and coordination, development and justification of National and European Projects (training, ICT, R+D+i, prevention of risks, environment, health ....) in all the sectors of activities. Its

principal role in the project will be the **coordination** of the same one, contributing also his experience for the study of the adjustment and normalization of the current Spanish contents to the rest of countries and development of the new training contents of prevention of labor risks.

Along with ARVI, SGS will be responsible for the dissemination of this project and its results in Spain in order to ensure an adequate impact and sustainability.

- **INFORCOOP, RTEU, IMP y EUROPECHE** will contribute to adapt and to improve the training contents in their country. They will contribute with a sectorial vision for the study of needs of their country, the adaptation of the current contents, the identification and development of the new preventive contents, as well as the users (trainers and workers) of the sector necessary for the Pilots.

Each entity, will be responsible for the dissemination of this project and its results in its country in order to ensure an adequate impact and sustainability.

- **EUROPECHE** will provide to the project with an important representativity of the sector at European level because is the "Association of National Organisations of Fishing Enterprises in the European Union". Represent: Germany (Deutscher Fischerei Verband), Belgium (Rederscentrale), Denmark (Danmarks Fiskeriforening), Spain (Confederación Española de Pesca – CEPESCA National Federation of Fishermen – FNCP), France (Union des Armateurs à la Pêche de France – UAPF, Fédération Française des Syndicats Professionnels Maritimes), Italy, Federazione Nazionale delle Impresa di Pesca – FEDERPESCA, Confederazione Cooperative Italiane - , FEDERCOOPESCA, Lega Nazionale Cooperative e Mutue – LEGAPESCA, Associazione General Cooperative Italiane - AGCI AGRITAL, Malta, Koperattivi Malta, Netherlands, Stichting van de Nederlandse Visserij, , Poland, North Atlantic Producer Organisations – PAOP, United Kingdom, National Federation of Fishermen’s Organisations – NFFO, Scottish Fishermen’s Federation - SFF.

EUROPECHE will have an important role **to promote and disseminate** the project and results at European level

## Methodology

This project will be developed across five **WORK PACKAGES**:

- **WP1:** MANAGEMENT, COORDINATION AND EVALUATION OF THE PROJECT
- **WP2:** PRELIMINARY STUDY AND IDENTIFICATION OF TRAINING NEEDS IN PREVENTION OF LABOR RISKS IN THE TRAWLING FISHING SECTOR
- **WP3:** PROTOTYPE OF PROGRAM NORMALIZED TO EUROPEAN LEVEL FOR THE MANAGEMENT OF THE PREVENTION OF LABOR RISKS IN THE TRAWLING FISHING SECTOR

- **WP4:** PROGRAM NORMALIZED TO EUROPEAN LEVEL FOR THE MANAGEMENT OF THE PREVENTION OF LABOR RISKS IN THE TRAWLING FISHING SECTOR
- **WP5:** DIFFUSION AND EXPLOTATION OF THE PROJECT AND ITS RESULTS

This project will have four **TRANSNATIONAL MEETINGS:**

- **Kick-off meeting in Vigo (Spain)**
- **Second meeting in Rome (Italy)**
- **Third meeting in Lorient (France)**
- **Third meeting in Rize (Turkey)**

During these transnational meetings, the consortium will analyze and plan the development of the project and visit a fieldwork in trawling ships and/or other facilities associated with the activity

Also, the consortium will have meetings by video/audio conference when will be necessary

To disseminate the results, are planned some **EVENTS** at the end of the project:

- **National InfoDay diffusion in Spain**
- **National InfoDay diffusion in Italy**
- **National InfoDay diffusion in France**
- **National InfoDay diffusion in Turkey**
- **European Conference of diffusion in Belgium**

#### Project Progress:

- The **Kick-off meeting** took place in Vigo (Spain) from 17-18 December 2014. Although this project has started officially its activity on September 1, 2014, it was not until this meeting, when members have had the opportunity to meet discuss together questions and approaches. During the second day of this meeting the partners visited to the **auction hall and trawling ship** as fieldwork. This kick-off meeting was very effective because were treated all aspect of methodology, budget, roles, timeline.... and partners exposed some changes in the transnational meetings and dissemination events dates that are necessary to develop a project with good results.

All partners have experience in this kind of projects and programs, so that the topics and items discussed to implement the project were of great interest, not focusing only in the project's objectives but in some aspects of the methodology are required to improve the effectiveness of its development

- ARVI and SGS are **managing, coordinating and monitoring the project.**
- The **specific tasks** which are developing currently are:
  - ARVI is programming the specific **website of the project**
  - The partners are formed the **Committees of management, economic control and evaluation**
  - All partners are developing the **“Preliminary Study of the Sector in preventive matter to European level”**.
  - All partners are developing the **stakeholders and end users databases.**

**More information:**

Quarterly, ARVI will send several newsletters with the status and progress of the project. However, you can view the updated information about it in [www.safefishing.eu](http://www.safefishing.eu)

If you do not wish to receive further information on this project please tell us by email at: [coapre@arvi.org](mailto:coapre@arvi.org)
